Thomas Wen

Harrison, NJ 07029 | (908) 251-2656 | twen40@gatech.edu| US Citizen

Objective

Highly motivated, conscientious student with a proven track record of delivering high-impact projects, from published research presented at IEEE MIT URTC to designing suspicious player detection system for an Epic Games Store-released multiplayer roguelike. Seeking a technical internship starting in May 2026.

Education

Georgia Institute of Technology | Atlanta, GA Expected Graduation, May 2028
Bachelor of Science in Computer Engineering, GPA 4.00

Skills

Programming: Java, Python, SQL, C++, Streamlit
Data & Analytics: Google BigQuery, Datadog, Splunk, Excel, GIS Software
Cybersecurity: Cryptography, Nessus Vulnerability Scanner, Virtualization, Microsoft Server
Developer Tools: GitHub, Google Cloud Platform, Linux/Unix
Communication: Presentations (large and small audiences), Design Proposals
Languages: English (native), Mandarin Chinese (native)

Experience

Manticore Games, Inc. | San Mateo, CA *June – August 2025*
Software Engineering Intern
• Developed a player behavior analysis tool for a multiplayer game, Out of Time, using BigQuery, Python, and Streamlit.
• Designed a suspicion scoring system to rank accounts based on statistical anomalies.
• Created a developer-facing dashboard for visualizing flagged accounts and metric breakdowns.
• Delivered on stretch goals including explainability metadata and automated data ingestion.

China CITIC Bank International | New York, NY *January – February 2025*
Information Technology Intern
• Assisted in Vulnerability Management using Nessus software to identify and prioritize security risks across infrastructure.
• Configured network devices and performed IT support for office systems and security platforms.
• Gained exposure to firewall, domain management, and IT compliance frameworks.

Publications

Mei, Olivia, Thomas Liu, Kaavya Kolli, Thomas Wen, Elizabeth Gillen, Sophia Blakely, and Benjamin Lee. "Reducing Noise Pollution with an Adaptive Barrier." In 2023 IEEE MIT Undergraduate Research Technology Conference (URTC), pp. 1-5. IEEE, 2023.

Relevant Coursework

Data Structures and Algorithms: Lists, Trees, Hash Maps, Graphs, Sorting Algorithms, Dynamic Programming, etc.
Intro to Object Oriented Programming: Java, Basic Data Structures
Intro to Discrete Math for CS: Proofs, Logic, Cryptography, Number Theory, Counting

Leadership

Teaching Assistant for Intro to Discrete Math for CS *January 2026 – Present*
- Lead weekly proof workshop recitations to reinforce course objectives.
- Conduct office hours twice weekly and manage grading for exams and homework.

Connect (Campus Leadership Org.) *August 2025 – Present*
- Organize on-campus events designed to foster community and “connect” students.

Researcher, Vertically Integrated Projects (VIP): Smart City Infrastructure *January 2026 – Present*
- Engage in multidisciplinary research in Traffic Sign Localization, utilizing computer vision to improve urban infrastructure.
